Theodore's Portfolio

Design Process - 1. Inspiration
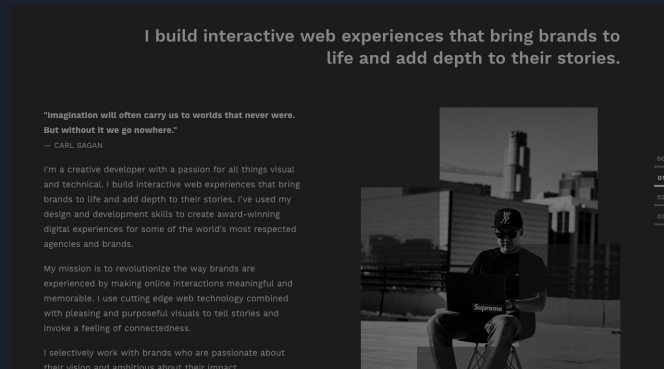

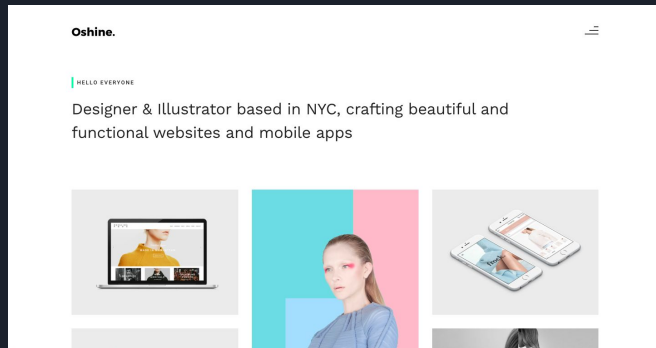

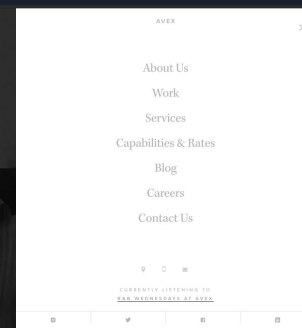

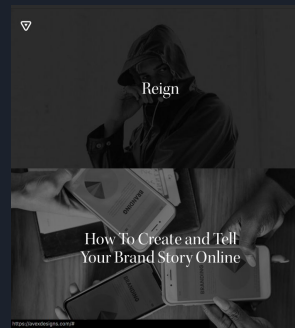

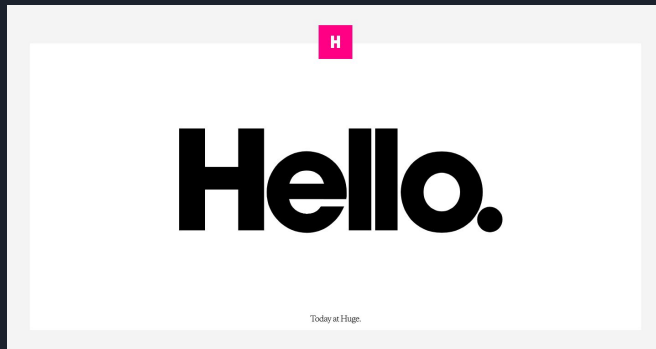

Design Process - 2. Brainstorm

Personal Portfolio Site

- animated page transitions, menus, links

Content:

- Who am I (build trust) / About / Contact / Values
  - Hello! I am Theodore Chuang. I improve people's lives by contributing to the internet. (how?)
  - I am a Canadian web development looking for opportunities based in Sydney. Currently I am practicing full stack web development full time at Coder Academy. In my spare time, I frequently hanging out at Meetups at night (JS, Ruby, Blockchain) or soaking in the beautiful scenery during the weekends.
  - Tech Stack: HTML, CSS/SASS, Ruby, JS/ECMA, Git/Github
  - In my previous career, I was a real estate appraiser in the public section for six years in Vancouver, Canada. Crunching data, building valuation models and defending my market estimation was my daily routine. Spreadsheets were my best friend. After moving to Sydney, I contributed to Optus's mobile deployment property team. Had a great time but I am looking to help people in other ways and at greater scale by leveraging technology,
  - I looking forward to working with you. Let's build something great together. <3
- Project Briefs
- Contact Me: (convert)
  - Compass > map
  - I believe technology is a powerful tool to create a better world. I am especially interested in exploring a decentralized consensus with blockchain, cryptocurrenices, and decentralized application.
  - I am currently available for freelance opportunities and available full-time after 2019 February. Happy to chat anytime.
  - Contacts Links (GitHub, Twitter, Medium, LinkedIn, Email) -CodePen?
- Projects (3-5):
  - Ruby Terminal
    - Ruby, design, collaboration
    - Copy Medium blog for details
  - Shipped blog mock up
    - HTML, CSS
    - Better images, polish
    - Should of built mobile first. Likely hard to go large to small
  - YelpCamp
    - Course: Full stack (MEN), Authentication (Passport) HTML, CSS, JS alerts
  - Portfolio
    - Design decisions / Process
      - Purpose
      - Note + Design + Mock ups
      - UX - what a hiring manager would be looking for, KISS (axed horizontal scrolling)
   - Raw VS Frameworks (learning > efficient - long term learn fundamentals)

HTML Sections:

- All Pages:
  - Nav Menu
    - button logo + full/partial screen menu layover (desktop bar / mobile) https://avexdesigns.com/
      - https://medium.com/@heyoka/responsive-pure-css-off-canvas-hamburger-menu-aebc8d11d793
    - Theodore Chuang > transforms left and forms logo or just TC (http://www.stephen-wells.com/)
      - https://codepen.io/btzt/pen/peXMXb (CSS One Page Vertical Nav)

Design Process - 3. Mockups

Design Process - 4. Planning

Design Process - 5. Code MVP :)
